UniMac®

If your operating cost are out of control, get the equipment that puts you in control!

They say if it ain't broke, don't fix it. But whether your old laundry equipment is broken or not, your laundry could use some fixing. If you haven't upgraded recently, your old equipment could be costing you big money in repair bills, machine downtime, and lost efficiency due to a lack of new technologies that today equipment offers.

It's time to take control of your laundry and proactively replace your old machines with new UniMac equipment. Combining unmatched durability, ground breaking technologies and industry-leading controls, UniMac optimizes efficiency and maximizes throughput while saving you thousands each year in utility, linen and labor costs.

Contact CLEC at 1-800-366-4168 to learn more.
