Clec Installs Another Ozone System

Colquitt county officials have embarked on an extensive project to reduce utility cost for both the Colquitt County Jail and the Colquitt County Prison. Every aspect of utility consumption is being addressed to include the installation of LED lighting, water saving commodes and Ozone systems for the laundry. The Ozone systems will reduce utility cost in several ways. First it allows linens and uniforms to be washed in cold water which has been infused with ozone to kill all bacteria and germs. Washing in cold water will generate significant savings in gas consumption which would normally be required for heating the water. Secondly, linens washed in ozone injected water dry much faster which saves on electric and gas consumption as well as reduced linen and uniform wear from spending less time in the dryer.

Laundry For The Modern World – Speed Queen Opl Products

For commercial laundry equipment designed for use in fire departments, health care facilities, hotels, correctional facilities, spas, salons, athletics organizations or another industry application, you can rely on the proven performance of Speed Queen to make your life simpler and more productive.

Made in America and refined for more than a century, Speed Queen laundry equipment represents a secure investment for your on-premises laundry facility.
